

Lifting and Compressor Technology
The Art of Lifting – Lifetime Business Partner

J.A. Becker & Söhne

After purchase is before service

With long-life investments like lifting platforms and compressors, the delivery to the customer is just the beginning. After the installation and implementing, the maintenance program begins. Yearly checks have to be carried out or wearing parts have to be replaced. We can offer our customers a comprehensive range of replacement parts and services. Our well-trained personnel offer good advice in maintenance, assembly, accident prevention tests and spare parts.

Our service range contains:

- Spare parts directly from the manufacturer
- Maintenance and yearly checks
- Complete workshop planning
- Foundation advice
- And others

Employees – the perfect mixture is important.

Our well-trained employees are working with highest competence and commitment. We have our own in-plan training and take care, that our knowledge is kept in the company by generation comprehensive team work. The satisfaction of the employees is shown in a very long seniority

and a very good working atmosphere. JAB has been presented with the award for being a „family-conscious“ company from the state government of Baden-Württemberg in 2014 especially for being family-friendly and having a systematic personnel policy.

Eine Partnerschaft, die Tore öffnet.

Unsere intelligenten Antriebe machen Wege einfacher. Wir den Weg dorthin. Indem wir zuhören, was für unsere Kunden wichtig ist. Und unser Wissen mit ihnen teilen.

Gemeinsam zur optimalen Lösung. Mit Becker.

The hydraulic vehicle lift

Since more than 90 years the development of vehicle lifts kept up with the development of the car industry, so that the current product range of the longest-existing company for lifting systems in Europe is able to supply a complete variety of lifting systems, ranging from passenger cars up to the heaviest specialized vehicles. We are concentrating on the oil hydraulic lifting technology, which can be adapted in cooperation with our customers according to their specific demands.

The product range contains lifting technology for:

- Passenger cars
- Commercial vehicles, buses and industrial vehicles
- Rail and special vehicles
- Industrial application and industrial automation

Compressors for all kind of applications

The company J.A. Becker & Söhne offers more than 100 years of experience in developing and manufacturing of high-quality medium and high pressure compressors. Our company is an European key supplier for NG-compressors for car filling and is the market leader in Germany.

The product range of JAB includes compressors and complete units for compression and treatment of air and natural gas. Also storage systems can be delivered.

Beside air compressors and corresponding peripheral devices we offer also units for compression of argon, helium or nitrogen. Several industrial applications like welding, plastic injection moulding or laser cutting.

With JAB you can have project planning, installation and maintenance from one source. We can also offer the certification with corporations like TÜV or German Lloyd – if requested.

STIEFEL EXPRESS

- Fertigung und Montage von Hydraulikschlauchleitungen bis DN 100/vor Ort bis DN 32
- Befestigungselemente und Verbindungen inkl. Steuerungstechnik
- Projektierung von Maschinen und Fahrzeugen
- Wertanalyse Ihrer Hydraulik- und Pneumatikanwendungen
- Gefahrenanalyse/ Beurteilung durch befähigte Person nach BetrSichV und DGUV Regel 113-015 (vormals BGR 237) für die Überprüfung von Hydraulikschläuchen

Partners of industry and manufacturers

Since more than 117 years J.A. Becker & Söhne is a widely recognized partner of industry and manufacturers. Together with its 150 staff members, the company supplies its customers with the most modern solutions in the range of compressed air and lifting technologies.

Our product range includes piston compressors from 40 up to 350 bar for compression of air and other gases as well as the whole range of compressed air treatment. The main emphasis in the production of lifting technology focuses on hydraulic lifts for the repair and service work on passenger cars, commercial vehicles and rail-driven vehicles. Furthermore, we offer individual solutions for specific problems.

The flexibility of a medium sized company in combination with high quality requirements, customer orientated planning, development and production and a complete range of services ensures that J.A. Becker & Söhne is a qualified partner for a wide range of customers worldwide.

We will be pleased to receive your topics and are glad to solve your application problems.

What can we do for you ? Please call us!
